

Peter's Keynote Requirements

Peter is 100% committed to ensuring your audience has the best possible experience during his keynote. Peter will bring:

- Apple Macbook Air to run his presentation through Keynote.
- USB-C Digital AV Multiport Adapter to plug into the venue's HDMI connection.
- Slide Clicker that will plug into his computer via USB. If presenting at a larger venue where Perfect Cue is being used, an additional USB port will be required to plug into Peter's computer.
- Peter has video in his slides and will require 3.5mm or HDMI plug into the speakers.
- Handheld microphone (preferred)

Additional Notes

Peter's slides are built with a lot of imagery that is irrelevant without Peter speaking, therefore he will not provide a copy of the slides post event.

Due to the size and program that the slides are built in, Peter will not be able to provide a copy prior to presentation.

The presentation has been designed to 16:9 ratio.

Once the MC begins introducing Peter, the AV team will switch to Peter's keynote holding page which will be a black slide with a small dot in the corner. Peter will commence presenting once the intro is complete, please do not advance the slides once the holding slide has been set.
